26. Ride Lockers
27. Mission S Ride Track
28. Ride Elevator A
29. Ride Elevator B

The Aqualab is laid out to bring visitors through an exciting series of experiences. Starting with the habitat exploration zones filled with interactive activities and games, guests will discover five different themed habitats all connected to the white sturgeon. From there, they will advance to the Sturgeon Lab, a futuristic high tech space which will bring them up to the third level and into the Mission S loading zone, where a sturgeon themed adventure in the Fraser River awaits.
